To Whom It May Concern,

I am writing this letter of recommendation for Structured Cabling Solutions.

I contacted Structured Cabling to do what I thought was a near impossibility: remove and scrap a botched cabling job (by another contractor) and run 400 CAT5 data and voice drops, tested and certified, in five days. To my surprise, their crews came in ready to do battle. All of the existing cable was pulled in under a day and new cable was being run by the very next day.

Time was an issue, as we had to move into the space on the sixth day. Structured Cabling not only finished the job on time as promised, but also did it in a most professional manner. I could not find fault with anything about the job. From the initial quote, to the careful attention given all the minutiae that makes a project a success, to the precise execution of the agreed-upon plan, Structured Cabling came through for me with flying colors.

Both Tony Batista and Ray Young are a pleasure to work with and I felt that they always had my best interest at heart. We plan on annexing an additional 40,000 square feet in December and I will certainly call Structured Cabling Solutions back to once again make me look good.

I give them my highest recommendation.
