To Whom It May Concern:

This correspondence is intended to confirm that Structured Cabling Solutions, Inc., headquartered at 5632 NW 161 Street in Miami Gardens, Florida, has worked for JDL Technologies on a sub-contractor basis.

In that capacity, Structured Cabling Solutions has successfully completed multiple projects as an extension of the JDL Technologies engineering team.

We do not hesitate to recommend their cabling services, nor would we have any concerns about using their services in support of any future engagements requiring extensive cabling services.

Please feel free to contact me directly should you require any greater detail.

Sincerely,

Scott Fluegge
President and General Manager
